

Home Screen

Toolbar Menu

The home screen is the first thing a user sees when they open the app.

Create Account opens the web page where they can register.

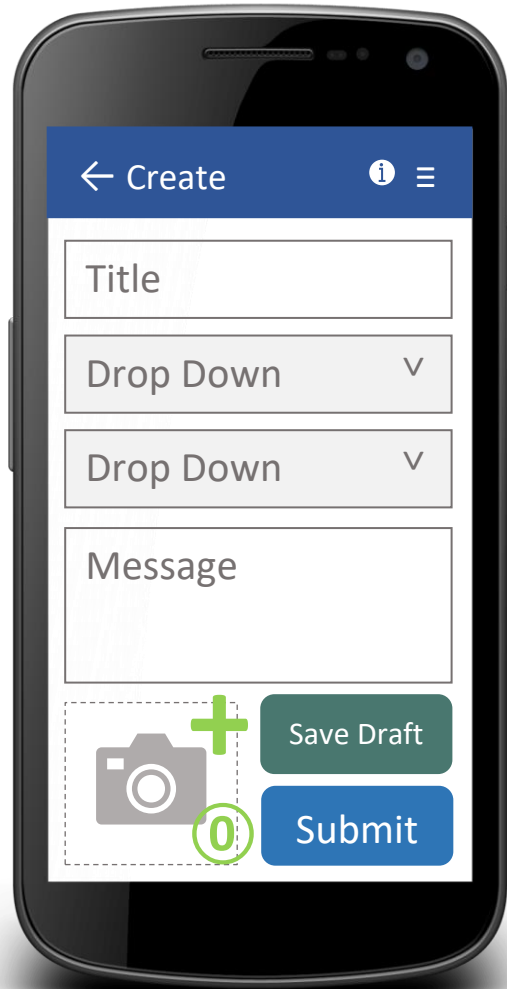

Create Report opens the Create Report Screen.

View Submissions opens the Submissions Screen.

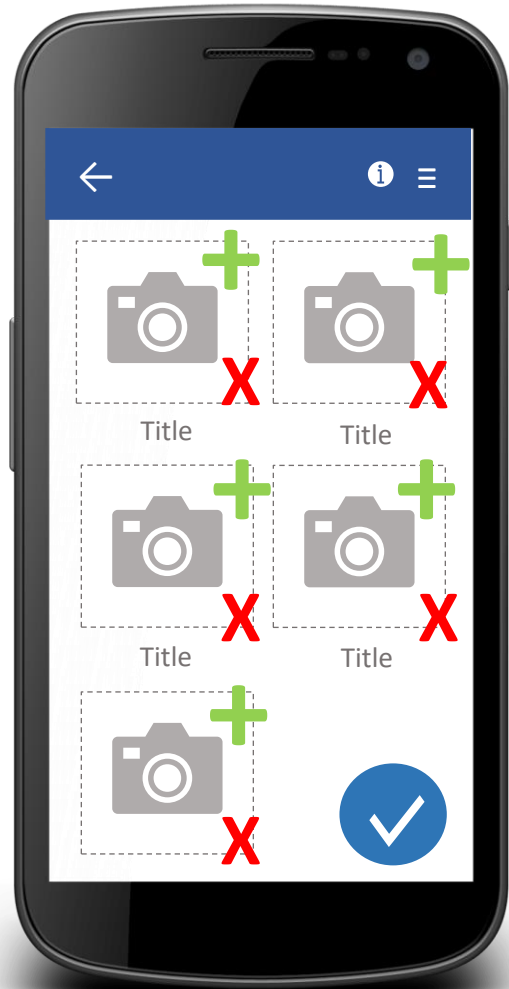

View Drafts opens a similar screen for drafts.

The Info button on the right of the toolbar opens the Instructions Screen.

Create Submission Screen

Adding Pictures Screen

The Create Submission form will have dropdown and text inputs.

Users can save the submission as a draft or submit it immediately.

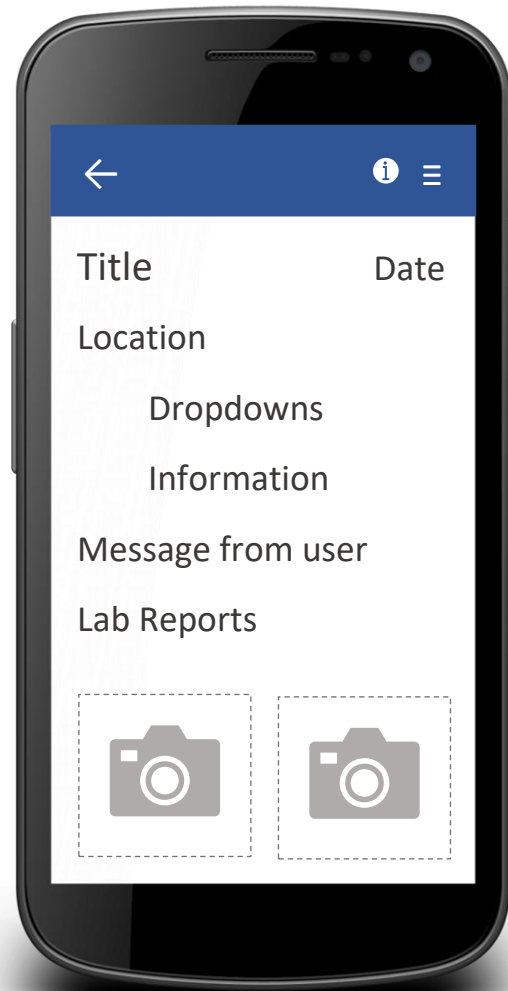

When users submit they will be prompted for their username and password and the report will be sent as soon as the phone connects to internet and authenticates their credentials.

The picture icon has a counter to track how many images they added to the submission.

Submissions Screen

View Submission Screen

When a submission is waiting for a network connection to send there will be a message to inform the user.

A submission without the message has been sent successfully.

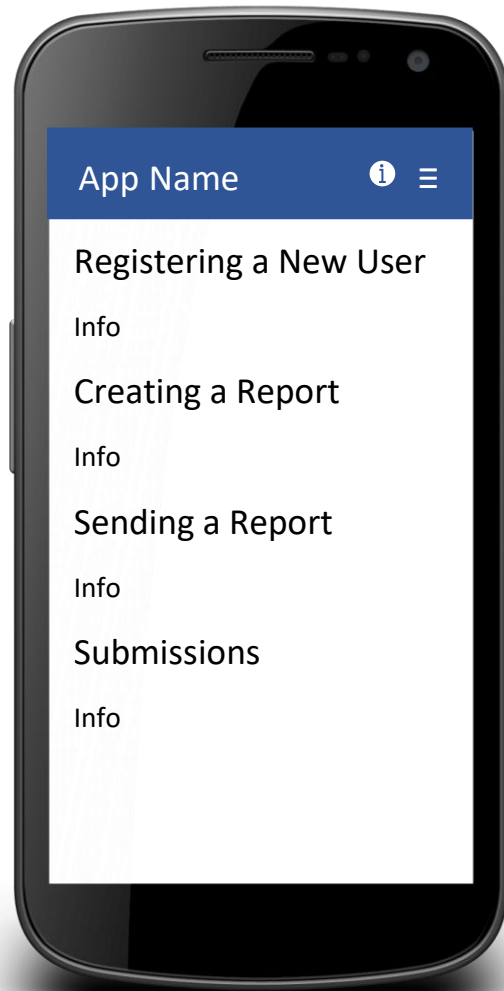

The View Submission Screen will include all the information attached to the submission, including user inputs, reviews and messages from the lab, and pictures.

If clicked the images will be downloaded so the user can view them.

Settings Screen

Instructions Screen

The Instructions Screen will have information about what each part of the app does and how to use it.

It can include detailed instructions on how to create a report.
